App Risk Analyzer Report

App Name: Calculator

Package: com.miui.calculator

Version: 15.3.3

Risk Score: 10/100

Verdict: Low Risk

Permissions

Access Note - Low

Display Over Other Apps - Low

System Permission Declare - Low

Internet - Low

Vibration - Low

Widget Write Settings - Low

Wi-Fi - Low

Widget Read Settings - Low

Multi-user Access - Low

Location - Medium

Network Status - Low

Access Provider - Low

Update - Low

Overlay Window - Low

Running Apps - Low

Foreground Service - Low

Modify System Settings - Low

AI Security Analysis

■ Overall Security Analysis
The Calculator app has a risk score of 10/100, indicating a low-risk application. However, upon reviewing the permissions, some concerns arise.

■ Dangerous Permissions
The app requests several permissions that could be considered risky, including:
* android.permission.INTERNET: allows the app to access the internet, potentially sending user data to external servers
* android.permission.ACCESS_COARSE_LOCATION: allows the app to access the user's location, which may not be necessary for a calculator app
* android.permission.SYSTEM_ALERT_WINDOW: allows the app to display windows on top of other apps, potentially leading to phishing attacks
* android.permission.INTERACT_ACROSS_USERS_FULL: allows the app to interact with other users on the device, which may be unnecessary for a calculator app

■ Privacy Concerns
The app's request for location and internet permissions raises concerns about user data privacy. The app may be collecting user data without a clear purpose.

■ Security Recommendations
To improve the app's security, the developers should:
* Review and remove unnecessary permissions
* Provide clear explanations for the required permissions
* Implement data encryption for user data

■ Final Verdict
Based on the analysis, the Calculator app is considered Moderate Risk. While the risk score is low, the app's permission requests and potential data collection practices raise concerns. Users should be cautious when installing this app and review the permissions carefully. It is recommended to use alternative calculator apps with fewer permissions and clearer data collection practices.
