Foreground Service - Low

Modify System Settings - Low

System Permission Declare - Low

Vibration - Low

AI Security Analysis

■ Overall Security Analysis
The Calculator app has a risk score of 10/100, indicating a low-risk application. However, upon reviewing the permissions, some concerns arise.

■ Dangerous Permissions
The app requests several permissions that could be considered risky, including:
* android.permission.INTERNET: allows the app to connect to the internet, potentially sending or receiving sensitive data
* android.permission.ACCESS_WIFI_STATE and android.permission.ACCESS_NETWORK_STATE: allows the app to access network information, which could be used to track the user's location
* android.permission.ACCESS_COARSE_LOCATION: allows the app to access the user's location, which could be used to track their movements
* android.permission.SYSTEM_ALERT_WINDOW and android.permission.SYSTEM_OVERLAY_WINDOW: allows the app to display windows on top of

other apps, potentially used for malicious activities

■ Privacy Concerns
The app's request for location and network access permissions raises concerns about user privacy. The app may be collecting and transmitting user data without their knowledge or consent.

■ Security Recommendations
To mitigate these risks, users should:
* Review the app's terms and conditions to understand how their data is being used
* Consider alternative calculator apps with fewer permissions
* Monitor the app's behavior for any suspicious activity

■ Final Verdict
Based on the analysis, the Calculator app is considered Moderate Risk. While the risk score is low, the app's request for certain permissions raises concerns about user privacy and potential malicious activities. Users should exercise caution when using this app and consider alternative options.
