Overlay Window - Low

Access Provider - Low

Widget Read Settings - Low

Vibration - Low

Wi-Fi - Low

Access Note - Low

Modify System Settings - Low

Widget Write Settings - Low

AI Security Analysis

■ Overall Security Analysis
The Calculator app has a risk score of 10/100, indicating a low-risk app. However, upon analyzing the permissions, some concerns arise.

■ Dangerous Permissions
The app requests several permissions that could be considered risky, including:
* android.permission.ACCESS_COARSE_LOCATION: allows the app to access the user's location
* android.permission.INTERNET: allows the app to connect to the internet, potentially sending user data
* android.permission.WRITE_SECURE_SETTINGS: allows the app to modify secure system settings
* android.permission.SYSTEM_ALERT_WINDOW: allows the app to display windows on top of other apps

■ Privacy Concerns

The app's request for location and internet permissions raises concerns about user data privacy. The app may be collecting user location data or sending user information over the internet.

■ Security Recommendations

To improve the app's security, we recommend:

* Removing unnecessary permissions, such as location and internet access
* Implementing data encryption for any user data stored or transmitted
* Providing clear documentation on data collection and usage

■ Final Verdict

Based on the analysis, we classify the Calculator app as Moderate Risk. While the risk score is low, the app's request for certain permissions raises concerns about user data privacy. We recommend users exercise caution when installing and using this app. With some modifications to permissions and data handling, the app could be considered Safe.
